Description of School Districts (2007 Data)

Percent Low-income Students

Average Students per School

How to interpret this district
This school district has:
approximately 300,000 students (bar height),
with over 900 students per school on average (line thickness),
50-69 percent of students are non-White (line color),
over 80 percent of students are low-income (circle size at top),
17 percent or more of students are English language learners
(presence of crossbar in the circle at top),
and less than 13 percent of students have disabilities
(missing dot at base).

● Percentage of students with disabilities is ≥ 13 percent (the eligible district average).

⊖ Percentage of English language learners is ≥ 17 percent (the eligible district average).

Ineligible School Districts
